Imagine the Internet without the wait.

2000 INTERNATIONAL CABLE-MODEM DEPLOYMENTS

Our second-annual international cable-modem deployment chart illustrates the ever-hastening race toward new revenue streams, with roll-outs from dozens of operators in nearly 50 countries.

At the same time, while some cable-modem manufacturers lead the market in deployments, it's clear that a number of firms are vying for — and securing — contracts with cable operators around the world.

So just how important is the international cable-modem market? Well, some of the biggest U.S.-based manufacturers say that much more than half

their sales come from outside their home territory.

An in-depth look at the U.S. cable-modem market appears in the March edition of our sister publication, *CED*.

A hearty thanks to cable-modem vendors and others who helped in research this year's chart. Future news on international cable-modem deployments can be sent to *CED* senior editor Jeff Baumgartner (fax: 1-303-470-4890, e-mail: jbaumgartner@cahners.com) or *Multichannel News International* managing editor Mike Galetto (fax: 1-212-463-6700, e-mail: mgaletto@cahners.com).

COUNTRY	CABLE OPERATOR/TELCO (CITY)	VENDOR	CABLE ISP
